

The background of the slide features a dark, blue-toned photograph of a coastal town at night. The town is built on a hillside overlooking the ocean, with numerous houses and buildings visible. A network of glowing white lines and dots is overlaid on the top half of the image, suggesting a digital or interconnected theme. The text is prominently displayed in the center.

PAMI OVERVIEW

- Overview of Menu Tabs
- Source of PAMI Details
 - Pulled from CCD Documents
 - Standardized data
- Limitation on Printing/Download

JULY 2026

PAMI Overview

- The Clinical Data menu has 3 other tabs for Allergies, Problems, and Immunizations, while Medications are listed under the Medications Management Menu.
- Before we discuss the individual PAMI tabs, we'll review where this information comes from, and the limitations around printing this *specific* data.

Results

- PAMI details are:**
- Pulled from CCD Documents:
Clinical Data > Structured Documents
 - Displayed when received in standardized formats (ex: ICD-10 Conditions)

PAMI – Download/Printing Limitation

- Data on the **PDMP** tab & **Immunizations** tab can be downloaded or printed using “Download PDF” button in top right
- **Problems, Allergies & Reported Medications** cannot be downloaded or printed using a button.

Possible Workarounds:

- 1 Take screenshots of the data and paste into Word (or similar).
- 2 If the data you are looking to print is minimal, use search or filter to narrow the view to **just** that item and attempt to print [**Control P**] to PDF. Depending on your browser settings and your zoom settings, it might fit on the screen [*but this is very limited*].
